

# I am a Scientist

When you think about what a scientist looks like, do you picture an older man with crazy hair, a lab coat, and bubbling beakers? Many people do! But anyone can be a scientist! When you ask questions about the world around you, make observations, look for information, try to figure out how something works, or try to solve a problem, you are acting like a scientist.

## Here are some things to think about to help you get started:

- What are you interested in?
- Where will you do your work?
- What kind of equipment?
- What are you wearing?

### Directions:

1. Cut out the directions using the dotted lines as a guide.
2. Paste one of the "I am a Scientist" directions to the top of your notebook page.
3. Create a full page color drawing of you as a scientist
